

V1

The door is wide open to my destiny
Cast in solid oak and iron
By Ancients before me
Space lies beyond it
With myriads of stars,
You're flying like an eagle
I take flight and soar with You...

V2

I'm flying through the cosmos with You my King
It's beyond any sensation,
Beyond anything
I could ever dream of,
I could ever sing,
My greatest adventure
Is to fly with You my King

Is to fly with You my King...

V3

We smile, we laugh, we're silent
Gaze at the breath-taking display
The awesome sight of splendour
Our hands hold gently...
"What's that over there?"
We head to the blue
Is it a tunnel?
We travel through

*(You have given me access to the Father
You have given me access to approach his throne
You have given me access to come close to You
You have given me access to come back home)*

To be continued...
